YES
Youth Entrepreneurial Spirit

Improving public health through success in school

An innovative project in Angered, Gothenburg
with support from Vinnova

Barbara Rubinstein, Region Västra Götaland, Sweden

#YESbxi

GIOVANI SÌ

Youth Entrepreneurial Spirit

The project

Use data related to student attendance in elementary school

Make a detailed prediction about the future school attendance

Insert the correct action depending on reasons behind previous cases of school absence

Increase school attendance

Increase high school qualifications

Improve public health

#YESbxi

Youth Entrepreneurial Spirit

Project partners

A project developed in close cooperation with the users

The work is being done by developers along with input from

- Teachers, mentors and principals
- Pupils and parents
- Researchers
- Student Health coordinators
- Public sector

#YESbxi

Pilot study

- Check if the tool works with sharp data
- Receive feedback from the users on the interfaces

#YESbxi

Autumn 2018

- Start usage for selected mentors
- Feedback (every other week)
- New version, prediction model and/or interface (every other week)
- Continuous participation, same teachers,
- A production-ready tool at the turn of the year
- Begin development of a student app in order to collect additional data

#YESbxi

Spring 2019

- Begin testing of the student app
- Use data from the student app in the algorithm
- Create reports for the school principals
- Iterative process together with a group of school principals

#YESbxi

Challenges

- Communication between different sectors (i.e. different cultures)
- To bring health-promoting work into the school sector
- It takes time to get access to both internal and external data
- To find solutions for transferring data between different systems
- The adjustments of the data for analysis is time consuming

#YESbxi

In accordance with Agenda 2030
